essentially for the maintenance of our power, and when we spoke of Indian interests we meant our own interests as the ruling power in India. Nor was there any reason to be ashamed of this, for our Indian Government was a paternal government, and the best interests of our Indian enbjects were bound up with the . strongth and maintenance of our rule." Surely if this is so, and in the second proposition we .. cordially agree, it cannot be true that if the people of India had any moderately remonable representatives they would be opposed to each military expenditure as is necessary to the maintenance of our Government. Nor do we believe that in incithey are opposed to it. They know perfectly well that if the English Government spent nothing on wolliers there would in a very few days or weeks be an unlimited military expenditure of another kind by every native prince. chief, and adventurer from one end of the country to the other, and that such an expenditure would be incalculably, more hurdensome than one taxation, whilst it would simply destroy that security for life and property which the population at present enjoys. Surely it is a great metabe to use language which implies t anything so mischievous as that the English Government in India not only rests upon military force (which ue doubt it does), but that it is unpopular with the great bulk of the native. population, and maintained in opposition to

their wishes, which certainly is not an accertained thing: Passing from the broad principles which were pecasionally and incidentally referred to by the different speakers to the comparatively narrow ! appears to us that the Government and Mr. Gladalone were right, and Mr. Fawcett and his to us that it is little better than postical paritanism to object to the employment of India troops for such a purpose as the one now propowed, the consent to Parliament to the measure. or its subsequent ratification of it, being always presumed. No answer was or indeed could be given to the argument. that the proposed arrangement would not coal the people of India one shilling. They would have had under any circumstances to: pay for the troops during the whole period of, their service. They are to be paid for all other expenses, and if it should become necessary to replace the troops removed from India the cost is to be paid by this country, so that in no event will the Indian revenue have to meet any incrawed expenditure whatever. The whole effect of the arrangement will be that a certain proportion of the India army will be sent upon a particular expolition in, which both officers and men are not only willing, but auxious to be employed. What reasonable objection con there he to this? Mr. Laing's rather unlacky, phrase about keeping the Bombay army in wind, supplied Mr. Bernal Osborne with material for a fow jokes, but in fact they all fell flat, for neither Mr. Laing not any one clas has been so abourd as to propose that the war should be undertaken for any such purpose. What Mr. Laing dil say upon the subject and the observation appears to us a very just one is e. that having determined apon the war upon other grounds, it is well to employ Indian forces in order to keep them in a state of efficiency. Those who appear to us to fall into the error of regarding Bugland and India as two unrelated independent Powers, each having its own interests and hearing its own burdens. This suraly is a

> Maximilian in Mexico. (From the " Times.")

The less that any one who takes up these ceta volumes knows of Mexico the more interesting. ore they will prove for they both coutain sketches Vat of Maxicun life and history, familiar enough to those who have a previous knowledge of the affines of the Kepublic, but new, probably, to the general reader. Mr. Felton's back is a lively and agreeable record of some rather nime. iva less wanderings in Mexico, at a time when many Europeana were attracted thither by curiosity or love of adventure. He gives his reader some little glimpers into Mexican life, which are sufficiently amoring to make his chapters worth the time it takes to read them. The narrative of the Countess Paula Hollouitz is of greater letters on account of the position she held at ome the Court of the ill-fated Imperial couple who in the space of three years, passed through every variety of viewsittide which relieves or tr's darkens homan life. The Countess svinces, it mir. is true, a four ness for small dotalls of her exwith share with her, and she dwells with unprofitable care upon descriptions of personal, sensations the under circumstances which are unforlopely unhing pleasast. She was very sea sick on her voyage min. out, and at such times, as was quite natural, while "great moral depression seized her;" the walls emy, of her cabin moved whon she would have pre-niles ferred them to be stationary; the ocean was nometimes blue and sometimes it was another n ut colour; the approach of a ship was interesting ; nt of hea life is monotonous; when one is at Madeira ortal it seems like being transported to fairlyland these are some of the Counters's observations. and they do not differ in any striking particular from the reflections of commonplace persons. But there is smothing better than all this in trustwirthy account of early passages in the night short rule of Maximilian which has yet seen the than light. The authorism was a decided sient upon the Empress, and every incident she roater lates in connexion with that aniertunate lady was in calculated to increase the pity which the rener civilized world has felt for her heavy sorrows. When an event is decided, and instead of the y we mysteries of the fature we have to deal with the e are facts of history, it is easy for a writer to make about us believe that he had a presentiment of all that was to follow. But the Counters Faula year estra of the Austrian rule in Mexico was consums the mate kat Queretaro, and therefore we do not early question the fidelity of her recollections when liture she fells us that "Kaiser Mux" left Miramar were with and forebodings. The citizens of Triests sent an address to him, and when it was pre-

She in that press was more sarguine and animated.
